BidWatch Report

Tuesday, April 7, 2020

This report contains all bid results that were received today. If you do not see a project listed that you are looking for, we did not receive the bid results today. Construction Update Project Information Specialists attempt to collect bid results on every project that we collect information for. This collection process begins one hour after each bid time and continues each day until we receive the bid results or we are told they will not be given out.

This report will list the projects that bid today first, then list bid results received today for projects that bid on previous days. All bid results listed are apparent low bids and do not necessarily mean the project was awarded.

For any questions regarding this information please do not hesitate to contact Construction Update at CUHelp@mbi.build or 515-288-7339
